

Schematic diagram of work area

Specification

Basic performance parameters	Machine working weight	lb (kg)	4448 (2017.5)
	Bucket capacity	ft³ (m³)	1.3 (0.036)
	Walking speed low/high speed	mph (Km/h)	0-0.93 (0-1.5)
	Gradeability	(%)	(30%)
	Ground specific pressure	psi (Kpa)	7066 (31.43)
	Maximum digging force	lbf (kN)	3507 (15.6)
	Maximum digging radius	in (mm)	163.1 (4143)
	Maximum digging depth	in (mm)	94.2 (2392)
	Maximum digging height	in (mm)	143.1 (3635)
	Maximum unloading height	in (mm)	93.6 (2377)
	Maximum deflection angle	(°)	111
	Track telescopic range	in (mm)	
Body	Transport length	in (mm)	120.4 (3057)
	Transport width	in (mm)	51.2 (1300)
	Transport height	in (mm)	80.2 (2038)
	Counterweight ground clearance	in (mm)	18.8 (487)
	Bucket width	in (mm)	15.7 (400)
	Boom length	in (mm)	73.6 (1870)
	Dipper length	in (mm)	36.4 (925)
Engine	Bulldozing board width	in (mm)	51.2 (1300)
	Engine brand		Kubota
	engine model		D1105
	Maximum horsepower	hp	24.4
	Maximum power	Kw	18.2
	Maximum speed	rpm	3000
	Displacement		1.123
	Number of cylinders		3
	cooling method		water cooling
	Engine oil replacement amount	gal (L)	1.1 (4.2)
	fuel form		diesel fuel
	Theoretical fuel consumption	(L/h)	1.3-1.5

Hydraulic system			
Main pump type/model	Gear pump	Multi-way valve brand	Taifeng Hydraulics
Main pump brand	Parker-1203	Rated set pressure (Mpa)	17MPa
Main pump maximum flow (L/min)	36	Maximum set pressure (Mpa)	18MPa
Multi-way valve	8-way hydraulic control valve	Travel hydraulic motor type	BWV-800WCD

- Please read the instruction manual carefully and use it correctly.
 - Be sure to fasten your seat belt during operation. ※Except for soft top specification
 - When driving construction machinery with a body weight of less than 3t, please receive "special education on driving construction machinery for vehicles" in advance, and be sure to participate in "skills training for driving construction machinery for vehicles" if it is more than 3t.
- R330 According to the conditions of the Occupational Safety and Health Act, the body mass may reach 1952kg
- In order to prevent breakdowns and accidents, be sure to check the machine regularly.

CLEAN EXHAUST GAS IS DISCHARGED, ENERGY-SAVING AND EFFICIENT.

**EXCELLENT PERFORMANCE, FULLY MEET THE
NEEDS OF ALL TYPES OF USERS.**

Complies with Stage 5 of European vehicle emission standards

Comply with U.S. EPA environmental standards

R330 SMALL EXCAVATOR

The machine is equipped with an environmentally friendly engine. It meets Euro V and EPA emission standards, is fuel-efficient, low-noise, and can achieve high power output. Durability, safety and comfort are comprehensively upgraded. Pilot operation on both sides, large arm side swing, shock-proof seat, equipped with hot and cold air conditioning, convenient and fast operation performance improves work efficiency.

Two side pilot operation

It uses a pilot handle with a load-sensitive multiplex valve, and the pilot handle is smoother, and you feel the contrast more clearly when you are driving.

Deflectable boom

Deflectable boom, multi-degree-of-freedom operation, large deflection angle, more flexible operation, and can meet more operating requirements

Oil cylinder protection

Cylinder cover can protect the cylinder during operation and avoid damage to the cylinder.

Improved plowing performance

Increase the bottom height of the bucket, Reduces the risk of contact with the loading platform

THREE UPGRADES

Reverse windshield

The openable design allows the operator to open the windshield when needed to enhance air circulation in the cab, which is particularly suitable for high-temperature working environments and improves the operator's comfort.

Bulldozing plate

The double-layer widened and thickened bulldozer has a longer service life

One forging oil cylinder

The one-piece forged cylinder rod is used which will not break and has higher precision.

R330 MINI EXCAVATOR

A high-dimensional intelligent fusion that is safe, comfortable, and easy to operate.

USING A LOAD SENSING SYSTEM

Pursuing High Performance for All Basic Performances, The system continuously controls the pump discharge flow rate by feeding back the "pump discharge pressure" and "actuator load pressure" to the LS regulator installed in the hydraulic pump, and only provides the required flow rate to the control valve.

Digital display instrument

The integrated digital instrument panel on the console has a large screen, simple display, and is easy to read. Moreover, due to its position on the side of the seat, it can be used to check various items with minimal visual movement during operation. Necessary information can be displayed through simple operations, and function buttons are located below the LCD to improve operability.

Power switch

The main switch of the power supply can be turned off with just one click, which can prevent power loss and fully protect the equipment during long-term shutdown

Arm drag

Improve operator comfort and operating efficiency, reduce fatigue

Battery level

Oil quantity

Water temperature

Lamp indicator light

Hydraulic oil alarm

Oil pressure alarm

Safety pilot lock

Safely operate the pilot lock handle to prevent misoperation and be safer.

Working equipment

The cast boom bracket is adopted, with a smooth and thick structure, one-piece molding, beautiful appearance and durability. The large arm is arranged with high-pressure iron pipes, which has a neat and beautiful appearance, effectively reduces the wear of the oil pipes, has a long service life, and is easy to replace some oil pipes for easy maintenance.

Semi-enclosed seat

Semi-enclosed shock-proof seat, ergonomically designed, adjustable, highly comfortable, as comfortable as a passenger car

Armrest box

Adopting a plastic armrest box, the appearance is more beautiful. The left armrest box adopts an upward flipping design, which is convenient for getting on and off during work. At the same time, the lever is a pilot lock switch, which protects the oil circuit and prevents accidents caused by accidentally touching the pilot handle when getting on and off. The upper side of the armrest box is equipped with a hand rest, which can work for a long time and reduce fatigue

Comfortable cab

The design concept of "driver centered" greatly reduces the noise and vibration inside the cab; Simultaneously equipped with an air conditioning system, it meets the needs of seasonal operations and improves the comfort and convenience of operations

Durable and easy to maintain

LED lighting

Warning lights

oil filler

engine

air filter

Built in walking motor

Thickened bulldozer shovel

One forging forming oil cylinder

Thickened large excavation bucket

Oil cylinder protection cover

Galvanized quenched pin shaft

Crushing hammer shut-off valve

> WE ARE RIPPA

Shandong Rippa Machinery Group Co., Ltd. is located in the Sixth Industrial Park, Jining high tech Zone, Shandong Province. It is a state-level high-tech enterprise with the right to import and export;

The company's staff are vigorous and enterprising, and constantly create the legend and glory of the school!

Shandong Rippa Machinery Group Co., Ltd.

Add: No.6 Industrial Park, Chongwen Avenue 2166, Gaoxin District, Jining City, Shandong Province

Some specifications are based on engineering measurements and may deviate from actual conditions. Specifications are for comparison purposes only and are subject to change without notice. Specifications of individual RIPPA equipment will vary based on normal variations in design, manufacturing, operating conditions and other factors. Some pictures of RIPPA equipment are not limited to standard packages.
